

V6000 Test Module

The V6000 is a new generation test module launched by Xinertel, which can meet the needs from basic function test, consistency test to high-density port performance test. At the same time, it can verify network solutions when deployed in enterprises, operators and data centers whether its network system can achieve the expected goal.

Key Features

- 10/100/1000M RJ45 auto-negotiation(copper port)
- 100/1000M SFP(fiber port)
- Support L2-3 traffic generation and protocol emulation
- Support FPGA based 100% line rate traffic generation, statistics, and packet capture
- Support the benchmark test suites such as RFC2544, RFC2889, and RFC3918
